Profile

Full Stack & DevOps Engineer with 4 internship experiences and SaaS projects deployed in production. I design, develop and deploy applications end-to-end — from frontend to Docker containerization and cloud deployment.

Work Experience

Elite Click

Beni Mellal

Mobile Developer — Digitalization of an advertising agency

Jul.–Oct. 2025 | Internship

- Developed 10 Flutter modules to digitalize and automate internal operations
- Designed a centralized MySQL system: modeling, creation and database maintenance
- Significant reduction of manual tasks through internal workflow automation

Fastcube

Casablanca

Full Stack / DevOps Developer — Intelligent digital platform

Apr.–Jul. 2025 | Final Year Internship

- Developed and deployed 9 features and 7 REST APIs in a Scrum environment (Jira)
- Backend optimization: **30%** reduction in response time through refactoring and DB tuning
- Containerization of backend services (NestJS) with Docker; version control with Git/GitHub
- Built a knowledge base of 154 entries for technical documentation

Verna Vert

Rabat

Desktop Developer — Green space management application

Aug.–Sept. 2023 | Internship

- Developed a C# / ASP.NET application with 4 business modules (Park, Residence, Villa, Claims)
- Full UML design: use case, sequence and class diagrams
- Implementation and management of SQL Server database with functional testing

Renault Riva Dacia

El Jadida

Desktop Developer — Customer management system

Mar.–Apr. 2022 | Internship

- Developed a C# / ASP.NET application with Entity Framework
- SQL Server and MySQL database management — 100+ customer records
- Integration of business features with .NET Framework

Education

- Computer Engineering & Networks, MIAGE track – EMSI 2022–2025 | Casablanca
- Specialized Technician in Software Development – OFPPT 2020–2022 | El Jadida
